B**

Electrolytes are minerals that carry an electric charge. They're found in blood, urine and sweat and play vital role in maintaining acid-base balance and osmotic pressure in body fluids.

Electrolytes found in your body include: Sodium, Potassium, Chloride, Calcium, Magnesium, Phosphate, Bicarbonate.

It is common in poultry, high temperature, transporation, vaccination process lead to electrolytic imbalances in birds.

Any electrolytic imbalance lead to production disruptions, poor quality eggs, poor growth, joint problems leading to economic losses.

More importantly, electrolyte imbalance affect metabolism of Amino Acids like Lysine and Methionine.

SUNEX introduces Electrolyte feed additive, addition of which gives an optimum level of 250 mEq level per kg of feed. There is no need to add Salt and Bicarbonates. This will help in eliminating electrolyte imbalance in the flock and shield you against economic loss.

SUNEX electrolyte water soluble formula instantly provides all electrolytes and lots of energy to birds. The triple sugars formula provide extended energy supplementation to keep the birds fresh.

SUNEX Oral Electrolytes Water Soluble Powder:
1 gm litre of drinking water continuously for 3-5 days

Packing: 1 kg

**SUNEX Dietary Electrolyte Balance (DEB)
Feed Additive Powder:**
Add 1 kg per MT feed. No need to add salt and Bicarbonates and any other electrolytes

Packing: 25 kg
